

Contents

A: Graphical Models (Introduction)	1
B: Markov Chains and Hidden Markov Models	22
C: Kalman Filtering and Smoothing	56
D: Conditional Independence and Factorization	73
E: The Elimination Algorithm	108
F: Probability Propagation and Factor Graphs	127
F: The Junction Tree Algorithm	156
G: Linear Classification	190
H: Completely Observed Graphical Models	221
I: The EM Algorithm	242
J: The Exponential Family and Generalized Linear Models	248
K: Sampling Methods	265
